SUBJECT INDEX

A

Acetylcholine, sensitivity of heart to, effects of acute hypoxia on, 1495
Acidity, gastric, response during administration of protein hydrolysates, 1627
variations in stimulated and nonstimulated stomach, diagnostic and therapeutic implications of, 1626
Actinomycosis, penicillin in treatment of, 521
Addisonian pernicious anemia, effect of vitamin B_{12} on hematopoietic and nervous systems in, 1646
Adrenal cortex, role of, in urate metabolism and in gout, 1473
Adrenalectomy and adrenal cortical hormone, influence of, on hypoferremia and other blood changes associated with injection of turpentine, 532
Adrenalin in normal and hypertensive patients, effects of, in relation to mechanism of sustained pressure elevations, 332
Albumin and globulin in serum or plasma, determination of, a rapid clinical method for the accurate, 367
egg, increase of complement units by, 239
globulin, and hemoglobin contents in human, micromethod for determination of, 1440
human, clinical method for determination of, by means of a precipitin reaction, 1052
Alcoholic fatty liver, observations on, with use of interval needle biopsy and liver function tests, 555
Allergy, food, acute torticollis due to, 1614
Alloxan, diabetic response of weanling rats to intravenous doses of, 1161
Amino acid preparation, a new lyophilized, determination of nitrogen balance index of, in protein-deficient patients, 280
Aminopterin, acute leucemia induced by, changes in blood and bone marrow in, 1481
treatment of acute leucemia with, 1642
Anemia, acute hemolytic, transient positive Wassermann test for syphilis in, 753
Addisonian pernicious, effect of vitamin B_{12} on hematopoietic and nervous systems in, 1646
aplastic, role of blood and bone marrow concentrations of atabrine in, 827
macrocytic, mucous membrane lesions of, effect of liver extract and vitamin B_{12} on, 1019
of infection, 532
of pregnancy treated with molybdenum-iron complex, 1641
pernicious, activity of microbial animal protein factor concentrates in, 860
cholinesterase activity of blood in, 189
Anemia, pernicious—Cont'd
life span of the megalocyte and the hemolytic syndrome of, 1068
vitamin B_{12} in, 1477
puerperal macrocytic, vitamin B_{12} in, 1477
sickle cell, pathogenesis of, and the life span of the sickle cell, 975
Anesthetized dogs, tidal volume recorder for, 784
Angina pectoris, electrocardiographic changes following meals in patients with, 1501
Angiocardiography, circulation times for, 1501
peripheral and direct intracardiac, comparative study, 1502
Animal protein factor concentrates, activity of microbial, in pernicious anemia, 860
Anoxemia test in hyperthyroidism, electrocardiographic response to, 1500
Anterior pituitary extract in treatment of pituitary dwarfism, evaluation of, 1615
Anti-A and anti-B isoagglutinin titers in Rh-immunized pregnant women, 1089
Antibiotic content, determination of, practical method for preparation of organs for, 904
Antibodies against renin and "sustained pressor principle" produced by kidney extracts, 1484
toxoplasma, neutralizing, occurrence of, in various disease conditions, 87
Antibody content of lymphoid cell extracts, determination of, 1563
formation following ingestion of heat-killed Brucella abortus, 1459
Anticoagulant drugs, effect of, upon coronary flow, 1455
therapy, use of intramuscular heparin for, 1652
Antifolic acid derivatives, effect of, on patients with far-advanced carcinomatosis, 1645
Antigen, cardiolipin, studies on, 1220, 1224
for Kahn test, standardization of, 1224
Antigenic differences among influenza A viruses, 1212
Antigens, yeast phase, in complement fixation test for histoplasmosis, 811, 1207
Antihistaminic agent, neohetramine a new, experimental and clinical studies of, 865
drug, decapryn succinate, experimental and clinical results, 319
2-[α-(2-dimethylaminoethoxy)-α-methylbenzyl]-pyridine succinate (decapryn succinate), experimental and clinical results, 319
drugs, anesthetic and antihistaminic action of a series of, in human skin, 1609

Antihistaminic drugs—Cont'd
failure of, to reduce reactive hyperemia in man, 1609
Antihyaluronidase antagonistic to pneumococcus hyaluronidase in serum of normal human beings and patients with pneumococcic pneumonia, 919
Antireticular cytotoxic serum in treatment of arthritis, 768
failure of, 1289
Antitoxin, diphtheria and tetanus, purification of, by use of pepsin, 757
Anuria, experimental, dietary and hormonal influences in, 1489
Apparatus for producing quantitative ischemia in limbs of animals, 1450
Arterioles of skin in essential hypertension, 1486
Arthritis, antireticular cytotoxic serum in treatment of, 768
distribution of gold in animal body in relation to, 1133
failure of antireticular cytotoxic serum in, 1289
gold compounds in treatment of, metabolism, toxicity, and manner of action of, 1381
Ascorbic acid, glycosuria simulated by the administration of; occurrence and differentiation, 1471
Asthma, action of pilocarpine on lungs in, 585
Atabrine, blood and bone marrow concentration of, and its role in aplastic anemia, 827
Atherosclerosis, development of, in chickens on normal and low fat diet, effect of diethylstilbestrol on blood lipids in, 733
Auricular fibrillation, dicumarol and quinidine in ambulatory treatment of chronic, 1492
etiology of, and the mechanism of its perpetuation, 1492

B

Bacteremia following tooth extraction, prevention with penicillin and gantrosan, 1461
Bacteremic pneumococcic pneumonia, rise of titer in, 919
Bacteria, streptomycin-resistant, development of, in stools of patients treated for tuberculosis, 1460
Bacteria-induced shock resulting from crushing of muscle of dogs, mechanism of, 502
Bacterial lymphadenitis, acute, pathogenesis of, 1458
populations, response of, to action of penicillin, 417
pyrogens, effects of, on malignant hypertensive persons, 1469
BAL and other thiol compounds, effect of, in preventing the inhibition of oxygen consumption of rat tissues produced by gold salts, 1381
effect of, on gold toxicity in rats, 1024
Barium diphenylamine sulfonate used as indicator for chromic acid titration in determination of volatile reducing substances in blood and gases, 126
Bedpan deaths, 1457
Bedside method for estimation of blood sugar, a simple, 644
Benadryl and pyribenzamine, comparison of toxic manifestations produced by, 595
rutin, and protamine, influence of, on experimental purpura in the guinea pig, 1651
Berylliosis, clinical study, 1613
Beta glucuronidase activity of human endometrium, 1619
Beta-dimethylaminoethyl benzhydryl ether hydrochloride and tripelennamine, comparison of toxic manifestations produced by, 595
Bilirubin in urine, quantitative determination of, method for, 890
Biologic fluids, ethanol in, colorimetric method for determination of microquantities of, 241
sodium in human, microcolorimetric determination of, 246
materials for common steam-volatile organic poisons, systematic qualitative analysis of, 371
tissue, radioactive isotopes from, recovery and estimation of, 1169
Biopsy, needle, of liver in hepatic cirrhosis, experiences with, 1627
use of interval, in observations on alcoholic fatty liver, 555
Blood and bone marrow, changes in, in acute leucemia induced by aminopterin, 1481
concentration of atabrine and its role in aplastic anemia, 827
in cirrhosis of liver, 1628
and urine lactate, influence of physical fitness and convalescence from major surgical procedures on the magnitude of the responses to exercise of, 1474
cells, red, destruction of, studies on, 1197
cholesterol and arterial intima in rat, effect of feeding propylthiouracil and cholesterol on, 1029
cholinesterase activity in normal, 203
in pernicious anemia, 189
clot retraction, effect of operation and illness on, description of new method, 347
coagulability, effect of digitalis on, 1653
coagulation, effect of nitrogen mustard and X irradiation on, 1566
concentration of labile factor of prothrombin complex in human, dog, and rabbit; significance in determination of prothrombin activity, 819
dyscrasias, serum proteins of, electrophoretic analysis of, 1523
ethanol in, colorimetric method for determination of microquantities of, 241
fat in, after intravenous administration of fat emulsions, turbidimetric determination of, 175

Blood—Cont'd
flow, effects of tetraethylammonium chloride on, in extremities of man, 743
in human extremities, compensating plethysmokymograph for measuring, 101
of dog, coronary, effect of certain sympatholytic agents on, 1496
glucose, screening method for, 236
heparinized in vitro, coagulation time of, test of; studies of normal subjects and those with intravascular thrombosis, 1342
human, measurement of electric resistance of; use in coagulation studies and cell volume determinations, 1110
iodine levels of man, influence of oxyquinoline drugs on growth of Endamoeba histolytica as measured in, 1632
levels, high vitamin A intake and, of cholesterol, phospholipids, carotene, and vitamins C, A, and E, 67
lipids, effect of diethylstilbestrol on, and on the development of atherosclerosis in chickens on a normal and low fat diet, 733
penicillin levels achieved with caronamide, role of high, in penetrating the blood-brain barrier, 933
peripheral, appearance of normoblasts in patients with pulmonary embolism, 1592
pH, spectrophotometric determination of, 881
pressure curves, intra-arterial, during tilting, 1483
effects of splanchnicectomy on, and on cardiac and renal function, 1485
maintenance in normal and toxemic pregnancy using tetraethylammonium chloride, evaluation of neurogenic and humoral factors in, 1466
radial or brachial, intra-arterial, alterations of, and of electrocardiogram induced by tilting, 951
relation of fluid intake to, 853
red counts, Hayem's solution in, methods to increase accuracy in use of, 1180
serum, electrophoretic study of, from lymphogranulomatous patients, 624
sugar, estimation of, simple bedside method for, 644
transfusion, direct, failure of, to raise the platelet level, 1077
volatile reducing substances in, determination of, using barium diphenylamine sulfonate as an indicator for chromic acid titration, 126
Blood-brain barrier, role of high blood penicillin levels achieved with caronamide in penetrating, 933
Body fluids, examination of, a modified technique for, 1195
surface temperature of, thermocouples for measurement of, improved mounting for, 1044
Bone marrow, cellular composition of, in normal infants and children, 1639
Bromsulfalein test of liver function, importance of rate of dye removal in, 448
Brucella abortus, antibody formation following ingestion of heat-killed, 1459

C

Cage limiting activity of rats, 1348
Cages containing cotton rats, device to facilitate the cleaning of, 519
Calcification, diffuse pancreatic, with diabetes mellitus, 1619
of costal cartilages, premature; association of, with psychoneuroses and endocrine imbalance, 1621
Cancer, microscopically controlled excision of, preparation of frozen sections for use in chemosurgical technique for, 392
of stomach, cytologic diagnosis of, 1633
Capillaries, thermal injury on, effect of various lethal procedures and, 497
Carcinoma, pulmonary, sputum cell study for, as routine laboratory test, 1588
Carcinomatosis, far-advanced, effect of antifolic acid derivatives on patients with, 1645
Cardiac catheterization, direct writing ossilograph for recording data obtained by method of, 1499
decompensation, qualitative and quantitative definition of cations and anions in, 1534
glycosides, action of several, on excitability and conduction velocity in dog heart, 1491
output, effect of apprehension caused by technical procedures on, 1494
sympathectomy, paroxysmal tachycardia benefited by, 1493
Cardiolipin antigen, studies on, 1220, 1224
Cardiorespiratory function, studies on, with the oxyhemograph, 1454
Cardiovascular-renal disease, complications of, effect of water by vein on the more severe, 1467
Caronamide, colorimetric determination of, 96
plasma concentration, urinary recoveries, and dosage, 297
Carotene, high vitamin A intake and blood levels of, 67
Casein hydrolysate, oral administration of, effect of, on total circulating plasma proteins of man, 453
Castor bean sensitivity, 1613
Catheterization, venous, with polyethylene tubing, 1597
Central Society for Clinical Research, president's address, October 29, 1948, 1458
twenty-first annual meeting, Chicago, Ill., October 29 and 30, 1948, transactions of, 1453, 1606
Cephalin-cholesterol flocculation and thymol turbidity tests in serum, a dilution turbidity test in comparison with, 672
test, serum albumin-globulin ratio, and thymol turbidity test for liver function, comparative study, 662

Cerebral lesions, volumes of closed hypothermal, relations between, and symptoms in rabbits, 1462
Cerebrospinal fluid, heterophile antibodies in, in infectious mononucleosis, 1204
Chemosurgical technique for microscopically controlled excision of cancer, preparation of frozen sections for use in, 392
Chemotherapy of filariasis, 216
Chlorine, effect of, on complement fixation, 254
Cholesterol estimation, total, convenient and rapid procedure for, using an acid chloroform extraction, 1322
high, vitamin A intake and blood levels of, 67
tolerance tests in normal, diabetic, and hypertensive patients, 1618
Choline, methionine, and low fat diet, effect of, on life expectancy of patients with cirrhosis of liver, 1123
Cholinesterase activity of blood, 203
in pernicious anemia, 189
determinations in liver disease, serial serum, 1475
Circulation time, accurate indicator for objective measurement, 910
for angiocardiography, 1501
Cirrhosis of liver, blood and bone marrow in, 1628
life expectancy of patients with, effect of choline, methionine, and low fat diet on, 1123
Cleaning of cages containing cotton rats, device to facilitate the, 519
Clinical erythroblastosis fetalis in newborn, maternal isoimmunization without evidence of, 526
Clot retraction, effect of operation and illness on, description of new method 347
Coagulability of blood, effect of digitalis on, 1653
Coagulation defect in thrombocytopenic purpura, 1479
time of blood heparinized in vitro, test of; study of normal patients and those with intravascular thrombosis, 1342
Cold hemagglutinin test by slide method, 1447
pressor test, effects of, on glomerular filtration and effective renal plasma flow, 430
Colitis, ulcerative, duodenal substance in chronic, clinical evaluation of, 1633
Colorimetric determination of caronamide, 96
estimation of pregnandiol in urine, simplified technique for the quantitative, 356
method for determination of microquantities of ethanol in blood and other biologic fluids, 241
of pregnandiol, a new, 251
Complement fixation, effect of chlorine on, 254
test for histoplasmosis, use of yeast phase antigens in, 811, 1207
Complement fixation test—Cont'd
for syphilis, quantitative, method for determination of titers between 10 and 100 in, 383
units, increase of, egg albumin, 239
Concentration of atabrine, blood and bone marrow, and its role in aplastic anemia, 827
of labile factor of prothrombin complex in human, dog, and rabbit blood; significance in the determination of prothrombin activity, 819
Conglutination test in erythroblastosis fetalis, 181
Coombs' serum, acquired hemolytic jaundice by, spleen as source of substance causing agglutination of red blood cells in, 1197
Coronary blood flow of dog, effect of certain sympatholytic agents on, 1496
flow, effect of anticoagulant drugs upon, 1455
Corticosteroids, chemical determination of, in urine and plasma, methods for, 1326
Costal cartilages, premature calcification of; its association with psychoneuroses and endocrine imbalance, 1621
Crystalline hemin solutions as permanent standards for hemoglobin estimation, 783
Crystallization of serotonin, 1606
Cultures, identification of, quick microtechniques for, 1334, 1338
Cushing's syndrome, steroid diabetes associated with, and excretion of 17-hydroxycorticosterone (compound F) in urine; metabolic studies, 1472
Cytochrome C, intravenous administration in man, 294

D

Decapryn succinate, new antihistaminic drug, experimental and clinical results of, 319
Delayed death, mechanism of, following thermal trauma, 506
Dental caries in an institutional population, correlation of lactobacillus counts with extent of, 1614
Dermal absorption, variations in, with age, 612
Desoxycorticosterone acetate and propylene glycol, effect of, in experimental renal hypertension, 1483
action, mechanisms of, 853
Diabetes, cholesterol tolerance tests in, 1618
experimental, nutrition and, 1161
mellitus, diffuse pancreatic calcification with, 1619
production of temporary, with pituitary adrenocorticotropic hormone; relation to uric acid metabolism, 651
tubular reabsorption of glucose in, effect of insulin on, 1616
Dibenamine, 1496
Dicumarol and heparin, comparative action of, on the in vivo clot, experimental study of, 721

Dicumarol—Cont'd
and quinidine in ambulatory treatment of chronic auricular fibrillation, 1492
effects of, on electrocardiogram, 972
in experimental myocardial infarction, 961
Dicumarol-induced hypoprothrombinemia in rats, effect of vitamin K on, 1431, 1651
Diet, low fat, effect of choline, methionine, and, on life expectancy of patients with cirrhosis of liver, 1123
rice, dangers from use of, 1468
sodium, the minimal, its effect upon blood pressure of ambulatory hypertensive subjects, 1482
Dietary influences in experimental anuria, 1489
Diethylstilbestrol, effect of, on blood lipids and development of atherosclerosis in chickens on a normal and low fat diet, 733
Diets, synthetic, 1059
Digitalis (cedilanid) and quinidine, experimental studies on combined action of, in cats, 1493
effect of, on coagulability of blood, 1653
Dihydroergocornine, effects of, on peripheral circulation in man, 1497
Diphtheria and tetanus antitoxin, purification of, by use of pepsin, 757
Disease, toxoplasma neutralizing antibodies in, 87
Diseases, thymol turbidity test in various, 565
Dog, heart, excitability and conduction velocity in, action of several cardiac glycosides on, 1491
Dogs, anesthetized, tidal volume recorder for, 784
crushing of muscle in, bacteria-induced shock resulting from, 502
intravenous injection of fat emulsion into, experimental studies, 689
Duodenal ulcer, comparison of twelve-hour nocturnal gastric secretion in uncomplicated, before and after healing, 1623
Dwarfism, pituitary, anterior pituitary extract in treatment of, evaluation of, 1615

E

Edema in nephrosis, relief of, by plasma albumin and gelatin infusions, 1491
of various origins, electrolyte partition in patients with, 1534, 1545
Egg albumin, increase of complement units by, 239
Electric resistance of human blood, measurement of; use in coagulation studies and cell volume determinations, 1110
Electrocardiogram, alterations of, by tilting, 951
effects of dicumarol on, 972
T wave of, factors influencing; experimental study employing intracavitary and epicardial leads, 1498
Electrocardiographic and pathologic findings in infarction of interventricular septum, correlation of, 1456
leads, multiple and special, devices for rapid recording of, 118
Electrolyte partition in patients with edema of various origins, 1534, 1545
Electrophoretic study of blood serum from lymphogranulomatous patients, 624
Emetine therapy in presence of heart disease, 1457
Endamoeba histolytica, influence of oxyquinoline drugs on, as measured in blood iodine levels of man, 1632
Endocrine imbalance, premature calcification of costal cartilages associated with, 1621
Endometrium, beta glucuronidase activity of human, 1619
Enterogastrone concentrates, effect of, on gastric secretion, 1622
Erythroblastosis fetalis, conglutination test in, 181
in newborn, maternal isoimmunization without evidence of clinical, 526
Erythrocyte counts, method of frequent estimations of circulating plasma volume with, 1650
Erythrocytes in urinary sediment; identification and normal limits, 875
use of preserved, for detection and identification of Rh antibodies, 1177
Estrogens, urinary, hydrolysis of conjugated, comparison of methods used for, 207
Ethanol, microquantities of, in blood and other biologic fluids, colorimetric method for determination of, 241
Ethylene glycol poisoning, clinical and pathologic study, 573
Evelyn macrocolorimeter, a microadapter for, 1594
Exophthalmic goiter, radioiodine tracers in, effect of varying dose of iodine on behavior of, 1615
Extremities, blood flow in human, compensating plethysmokymograph for, 101

F

Familial hypoprothrombinemia, 542
Fat emulsions for intravenous nutrition, 175
intravenous injection of, into dogs, experimental studies on, 689
soybean phosphatides as emulsifiers for, 163
tolerance of dogs to, 143
metabolic studies on puppies infused with, 1503
preparation of, for intravenous nutrition, improved techniques for, 153
in blood, turbidimetric determination of infused, after intravenous administration of fat emulsions, 175
Fever, Haverhill, bacteriologic diagnosis, 1608
Fibrotic reactions, physical mechanism of, 1454
Filariasis, chemotherapy of, 216
Flocculation tests, combination of, in differential diagnosis of jaundice, 1630
Folic acid antagonist, treatment of chronic leucemia with, 1643
metabolism studies, 1271
treatment of acute leucemias with analogues of, 1641
Food allergy, acute torticollis due to, 1614

4-Amino-pteroylglutamic acid, treatment of acute leucemia with, 1642
Frozen sections, preparation of, for use in chemosurgical technique for microscopically controlled excision of cancer, 392

G

Gantrosan and penicillin, prevention of bacteremia following tooth extraction with, 1461
Gastric acidity response during intravenous administration of protein hydrolysates, 1627
secretion, effect of enterogastrone concentrates on, 1622
twelve-hour nocturnal, comparison of, in uncomplicated duodenal ulcer before and after healing, 1623
secretory response to histamine, incidence of symptoms and, in patients with and without chronic gastritis, 1624
Globin and porphyrin metabolism made with C^{14} and N^{15}, 1478
Glomerular filtration and effective renal plasma flow, effects of cold pressor test on, 430
Glucose, tubular reabsorption of, in diabetic patients, effect of insulin on, 1616
Glycine administered by vein, efficacy and safety of, 1555
Glycosuria simulated by the administration of ascorbic acid; occurrence and differentiation, 1471
Goiter, exophthalmic, radioiodine tracers in, effect of varying dose of iodine on behavior of, 1615
Gold compounds in treatment of arthritis, metabolism, toxicity, and manner of action of, 1381
distribution of, in animal body in relation to arthritis, 1133
toxicity in rats, effect of BAL on, 1024
Gout, role of adrenal cortex in, 1473

H

Haverhill fever, bacteriologic diagnosis, 1608
Hayem's solution for red blood counts, methods to increase accuracy in use of, 1180
serum flocculation reaction with, routine use of, 1629
Heart disease, congenital, intravenous catheterization of heart in diagnosis of, 1489
emetine therapy in presence of, 1457
intravenous catheterization of, in diagnosis of congenital heart disease, 1489
sensitivity of, to acetylcholine, effects of acute hypoxia on, 1495
Hemagglutinin test, cold, by a slide method, 1447
Hematopoietic tissues, radioarsenic (As^{76}) in treatment of leucemia and allied disorders of, 1649
Hemoglobin, determination of, as pyridine hemochromogen, 1638
estimation, crystalline hemin solutions as permanent standards for, 783
oxygen saturation of, recording of, by a whole-blood oximeter, 1637
Hemolytic diseases, plasma catalase in, 487
transfusion reactions, intragroup incompatibility with respect to Hr blood factors as a cause of minor, 985
Hemophilia, current theories and successful management in traumatic and surgical crises, 708
Hemosiderin, sternal marrow, 81
Heparin and dicumarol, comparative action of, on the in vivo clot, experimental study of, 721
commercial, effect of, on platelet count, 1410
effect of, on platelets in vivo, 1424
use of intramuscular, for anticoagulant therapy, 1652
Hepatic cirrhosis, needle biopsy of liver in, experiences with, 1627
qualitative and quantitative definition of cations and anions in, 1545
dysfunction in infectious mononucleosis; review of literature, 1258
Hepatitis, infectious, inadvertently transmitted with therapeutic malaria, 998
urine in acute, antidiuretic activity of, 1476
Heterophile antibodies, demonstration of, in cerebrospinal fluid in infectious mononucleosis, 1204
Hetrazan, pharmacodynamic properties of, 216
Histamine administration during pregnancy, clinical observations on, 1601
antagonists, 319
gastric secretory response to, incidence of symptoms and, in patients with and without chronic gastritis, 1624
test for presence of hypertensive diencephalic syndrome using, 1470
treatment of retrobulbar neuritis, 1611
Histoplasmosis, complement fixation test for, yeast phase antigens in, 811, 1207
Hodgkin's disease, sternal marrow studies in, 1640
syndrome, studies in, 1002
Hookworm, need of differentiation of trichostrongylus infection in human beings from, 869
Hormonal influence in experimental anuria, 1489
Hr blood factors, intragroup incompatibility with respect to, as a cause of minor hemolytic transfusion reactions, 985
Hydrolysis of conjugated urinary estrogens, comparison of methods used for, 207
Hyperemia, reactive, failure of antihistaminic drugs to reduce, 1609
Hyperglycemia, effect of, on clearances of inulin and para-aminohippuric acid, 1617
Hypertension, arterioles of skin in, 1486
arteriovenous nicking in, long-term study of, 1486
cholesterol tolerance tests in, 1618
insulin tolerance in, 1487
new method of studying, 1483
pulmonary, in chronic hypertrophic pulmonary emphysema, 1453

Hypertension—Cont'd
thiocyanate content of saliva in, before and after ingestion of drug, 772
Hypertensive diencephalic syndrome, test for presence of, using histamine, 1470
Hyperthyroidism, anoxemia test in, electrocardiographic response to, 1500
surgical management of, medical and metabolic factors in, 1618
Hypertrophic pulmonary emphysema, pulmonary hypertension in chronic, 1453
Hypoalbuminemia, frequency and significance of; studies in serum proteins, 1276
Hypoferremia and other blood changes associated with injection of turpentine, influence of adrenalectomy and of adrenal cortical hormone on, 532
Hypoprothrombinemia, dicumarol-induced, in rats, effect of vitamin K on, 1431, 1651
idiopathic (familial), 542
Hypospray apparatus, administration of penicillin and streptomycin by means of, 805
Hypoxia, acute, effects of, on sensitivity of heart to acetylcholine, 1495

I

Idiopathic hypoprothrombinemia, 542
Ileus, pyloric balance in, 1625
Infarction of interventricular septum, electrocardiographic and pathologic findings in, correlation of, 1456
Infection, anemia of, 532
response, nutritional status and, 47
suppurative, in man, studies on prolonged, 1607
Infectious mononucleosis, hepatic dysfunction in; review of literature, 1258
heterophile antibodies in cerebrospinal fluid in, 1204
Influenza A viruses, antigenic differences among, including serologic response of patients, 1212
and pneumonia, 32
serologic studies of, during and after outbreak of influenza B, 32
in Boston, serologic studies of, during winter of 1945-1946, 15
vaccination against, results of, during the epidemic of 1947, 789
viruses, isolation and identification of, during epidemic of December, 1945, 309
Insulin, effect of, on tubular reabsorption of glucose in diabetic patients, 1616
tolerance in hypertension, 1487
Interventricular septum, infarction of, electrocardiographic and pathologic findings in, correlation of, 1456
Intragroup incompatibility with respect to Hr blood factors as cause of minor hemolytic transfusion reactions, 985
Inulin and para-aminohippuric acid, effect of hyperglycemia on clearances of, 1617
Iodine, effect of varying dose of, on behavior of radioiodine tracers in exophthalmic goiter, 1615
Iron stores in man, determination of available, method for, 81
Isoagglutinin titers, anti-A and anti-B, in Rh-immunized pregnant women, 1089
Isoimmunization, maternal, without evidence of clinical erythroblastosis fetalis in newborn, 526

J

Jaundice, acquired hemolytic, by Coombs' serum, spleen as source of substance causing agglutination of red blood cells in, 1197
differential diagnosis of, combination flocculation tests in, 1630
Jet injection, administration of penicillin and streptomycin by means of, 805
J.S.B. stain, modified method of preparing, 777

K

Kahn test, antigen for, standardization of, 1224
Kidney, a resin artificial, 841
extracts, antibodies against renin and "sustained pressor principle" produced by, 1484

L

Labile factor of prothrombin complex, concentration of, in human, dog, and rabbit blood; significance in determination of prothrombin activity, 819
Laboratory methods, 96, 236, 357, 511, 644, 777, 875, 1037, 1169, 1311, 1440, 1588
Lactate, blood and urine, influence of physical fitness and convalescence from major surgical procedures on the magnitude of the responses to exercise of, 1474
Lactobacillus counts, correlation of, with extent of dental caries in an institutional population, 1614
Lecithin, sensitivity of, variations in different lots of purified, 1220
Lethal procedures, effect of various, and thermal injury on capillaries, 497
Leucemia, acute, induced by aminopterin, changes in blood and bone marrow in, 1481
effect of urethane on, further studies on, 1647
radioarsenic (As^{76}) in treatment of, 1649
treatment of acute, with aminopterin (4-amino-pteroylglutamic acid), 1642
with analogues of folic acid, 1641
chronic, with a folic acid antagonist, 1643
Life span of sickle cell and the pathogenesis of sickle cell anemia, 975
Ligation of pancreatic ducts, effect of, and of pancreatectomy after duct ligation on serum lipase, 833
Lipids, ingestion of various, influence of, upon the thymol turbidity, 1630
Liver, alcoholic fatty, observations on, with interval needle biopsy and liver function tests, 555

Liver—Cont'd
antipernicious anemia factor of, and pteroylglutamic acid for hematopoiesis, essentiality of both, 1647
cirrhosis of, blood and bone marrow in, 1628
life expectancy of patients with, effect of choline, methionine, and low fat diet on, 1123
disease, serial serum cholinesterase determinations in, 1475
extract and vitamin B_{12}, effect of, on mucous membrane lesions of macrocytic anemia, 1019
function, bromsulfalein test of, importance of rate of dye removal in, 448
serum albumin-globulin ratio, cephalin-cholesterol flocculation, and thymol turbidity tests for, a comparative study, 662
tests in observations on alcoholic fatty liver, 555
needle biopsy of, in hepatic cirrhosis, experiences with, 1627
portal cirrhosis of, clinical and functional study, 1475
structural and functional alterations of, relation between, 435
Lower nephron nephrosis, management and clinical course of, 1606
Lungs, action of pilocarpine on, in normal and asthmatic subjects, 585
Lymph, collection of, from liver, small intestine, or thoracic duct of rat, techniques for, 1349
Lymphadenitis, acute bacterial, pathogenesis of, 1458
Lymphoblastoma cutis and scleroderma, paraaminobenzoic acid therapy in, 1462
Lymphogranulomatous patients, electrophoretic study of blood serum from, 624
Lymphoid cell extracts, antibody content of, determination of, 1563
Lyophilized amino acid preparation, a new, determination of nitrogen balance index of, in protein-deficient patients, 280

M

Macrocolorimeter, Evelyn, a microadapter for, 1594
Macrocytic anemia, mucous membrane lesions of, effect of liver extract and vitamin B_{12} on, 1019
Malaria, sporozoite-induced vivax, incidence of false positive tests for syphilis and, 747
therapeutic, infectious hepatitis inadvertently transmitted with, 998
use of Plasmodium vivax preserved by freezing in inducing, 1579
Malignant hypertensive persons, effects of bacterial pyrogens on, 1469
Mammalian striated myofibrils, preparation and properties of, 1612
Mandelamine (methenamine mandelate), absorption, distribution, and renal excretion of, 1304
Measurement of surface temperature of body, thermocouples for, improved mounting for, 1044
Megalocyte and hemolytic syndrome of pernicious anemia, life span of, 1068
Mercurial diuretic for subcutaneous injection, experiences with a, 1635
Mercuric bichloride for biologic studies, factors in use of, with especial reference to blood counts, 1094
Mescaline hallucinations, effect of succinate in, 1297
Metabolic studies on puppies infused with fat emulsions, 1503
Metabolism, globin and porphyrin, made with C^{14} and N^{15}, 1478
protein, dynamics of, 257, 269
studies, folic acid, 1271
Methenamine mandelate, absorption, distribution, and renal excretion of, 1304
Methionine, choline, and low fat diet, effect of, on life expectancy of patients with cirrhosis of liver, 1123
Methyl-bis (B-chloroethyl) amine hydrochloride, clinical observations with, 1648
Micro- and macroelectrophoretic analysis of human and rat serum, a comparative study of, 75
Microadapter for the Evelyn macrocolorimeter, 1594
Microbial animal protein factor concentrates, activity of, in pernicious anemia, 860
Microcolorimetric determination of sodium in human biologic fluids, 246
Micrometer burette, a Scholander, of simple construction, 1193
Micromethod for determination of human albumin, globulin, and hemoglobin contents, 1440
of serum streptomycin levels, 886
Microorganisms, pathogenic, use of splenic infusion as a base for growing certain, 1037
Microtechniques for identification of cultures, quick, 1334, 1338
Molybdenum-iron complex, anemia of pregnancy treated with, 1641
Mononucleosis, infectious, hepatic dysfunction in; review of literature, 1258
heterophile antibodies in cerebrospinal fluid in, 1204
thrombocytopenia secondary to, 1652
Myelitis following administration of neoarsphenamine, 1165
Myocardial infarction, dicumarol in experimental, 961
extremity and precordial leads in diagnosis of acute, a comparative evaluation of, 1500
observations of 100 patients with, who survived up to six years, 1488
Myofibrils, mammalian striated, preparation and properties of, 1612

N

Needle biopsy of liver in hepatic cirrhosis, experiences with, 1627
Neoarsphenamine, myelitis following administration of, 1165

Neohetramine, a new antihistaminic agent, experimental and clinical studies, 865
Nephron nephrosis, management and clinical course of lower, 1606
nature of the altered renal function in lower, 1468
Nephrosis, edema in, relief of, by plasma albumin and gelatin infusions, 1491
Neuritis, retrobulbar, treatment with histamine, 1611
Newborn, erythroblastosis fetalis in, maternal isoimmunization without evidence of clinical, 526
Nicotinic acid amide, effect of, on experimental tuberculosis of white mice, 1249
Nitrogen balance index, determination of, in a new lyophilized amino acid preparation in protein-deficient patients, 280
studies, comparative, of oral protein derivatives and natural protein in protein-deficient patients, 1634
mustard and X irradiation, effect of, on blood coagulation, 1566
inhibitory effect of, on development of humoral antibodies, cutaneous hypersensitiveness and vascular lesions in rabbits following injections of horse serum, 1463
therapy, 1002
Normoblasts in peripheral blood, appearance of, in patients with pulmonary embolism, 1502
Nutrition and experimental diabetes, 1161
effect on tumor response in Rous chicken sarcoma, 1139
intravenous, fat emulsions for, 175
improved techniques for preparation of, 153
parenteral, 143, 153, 163, 175, 1503
Nutritional status and infection response, 47

O

1-Diethylcarbamyl-4-methylpiperazine hydrochloride, pharmacodynamic properties of, 216
Ossilograph, direct writing, for recording data obtained by method of cardiac catheterization, 1499
Oximeter, whole-blood, recording of oxygen saturation of hemoglobin by, 1637
Oxyhemograph, studies on cardiorespiratory function with, 1454
Oxyquinoline drugs, influence of, on growth of Endamoeba histolytica, as measured in blood iodine levels of man, 1632

P

Palpitation, 1487
Pancreatic calcification, diffuse, with diabetes mellitus, 1619
ducts, effect of ligation of, and of pancreatectomy after duct ligation on serum lipase, 833
function, studies on, 1047
Para-aminobenzoic acid, effect of, on metabolism and excretion of salicylate, 1393
therapy in scleroderma and lymphoblastoma cutis, 1462
Parenteral nutrition, 143, 153, 163, 175, 1503
Paroxysmal tachycardia, low nodal, benefited by cardiac sympathectomy, 1493
Pathogenesis of acute bacterial lymphadenitis, 1458
Pathologic specimens, imbedding of, in transparent plastic, 1311
Penicillin and gantrosan, prevention of bacteremia following tooth extraction with, 1461
and streptomycin, administration of, by means of hypospray apparatus (jet injection); absorption, toxicity and stability, 805
in isolation of poliomyelitis virus from fecal specimens, 1402
in treatment of actinomycosis, 521
levels, high blood, achieved with caronamide, role of, in penetrating the blood-brain barrier, 933
plasma protein fractions in action and transport of, 1608
procaine, therapeutic efficiency and comparative study of absorption, 1232
rectal absorption of, 135
response of bacterial populations to the action of, 417
Pepsin, purification of diphtheria and tetanus antitoxin by use of, 757
Peptic ulcer, bleeding, 1624
Peripheral circulation in man, effects of dihydroergocornine on, 1497
Pernicious anemia, activity of microbial animal protein factor concentrates in, 860
cholinesterase activity of blood in, 189
life span of the megalocyte and the hemolytic syndrome of, 1068
Pharmacology of hetrazan, 216
Phenol production, effect of phthalylsulfathiazole and streptomycin on, 845
retention, relation of, to uremia, 845
Phospholipids, high vitamin A intake and blood levels of, 67
Phthalylsulfathiazole and streptomycin, effect of, on phenol production, 845
Pilocarpin, action of, on lungs in normal and asthmatic subjects, 585
Pituitary adrenocorticotropic hormone, production of temporary diabetes mellitus with, 651
dwarfism, anterior pituitary extract in treatment of, 1615
Plasma, albumin, and globulin in, determination of, a rapid clinical method for the accurate, 367
catalase in hemolytic diseases, 487
in normal adults, method for determination of, and values obtained, 480
concentrations of caronamide, 297
corticosteroids in, methods for chemical determination of, 1326
defect in patients whose bleeding is temporarily controlled by protamine

Plasma—Cont'd
sulfate or toluidine blue, 1480
protein fractions, role of, in action and transport of penicillin, 1608
of man, effect of oral administration of casein hydrolysate on total circulating, 453
studies in children with rheumatic fever, 1490
vitamin A alcohol, influence of endogenous and nutritional factors upon, 1631
volume, circulating, method of frequent estimations of, with erythrocyte counts, 1650
Plasmodium vivax preserved by freezing, use of, in inducing malaria, 1579
Plastic, transparent, imbedding of pathologic specimens in, 1311
Platelet count, effect of commercial heparin on, 1410
Platelets in vivo, effect of heparin on, 1424
Plethysmokymograph, a compensating, for measuring blood flow in human extremities, 101
Pneumococcus hyaluronidase in serum of normal human beings and patients with pneumococcic pneumonia, antihyaluronidase antagonistic to, 919
Pneumonia and influenza, 32
serologic studies of, after outbreak of influenza B, 32
bacteremic pneumococcic, rise of titer in, 919
Poisoning, ethylene glycol, clinical and pathologic study, 573
Poisons, common steam-volatile organic, systematic qualitative analysis of biologic materials for, 371
Poliomyelitis virus, isolation of, from fecal specimens, use of penicillin and streptomycin in, 1402
Polyethylene tubing, venous catheterization with, 1597
Porphobilinogen tests on 1,000 patients in search for false positive reactions, 1254
Portal cirrhosis of liver, clinical and functional study, 1475
Precipitin reaction, determination of human albumin by means of, clinical method for, 1052
Pregnancy, anemia of, treated with molybdenum-iron complex, 1641
blood pressure maintenance in normal and toxemic, using tetraethylammonium chloride, evaluation of neurogenic and humoral factors in, 1466
histamine administration during, clinical observations on, 1601
Pregnandiol, colorimetric method for determination of, a new, 251
in urine, quantitative colorimetric estimation of, simplified technique for, 356
Pregnant women, Rh-immunized, anti-A and anti-B isoagglutinin titers in, 1089
Pregnant women—Cont'd
urinary volume of, effect of sedatives on, 1465
President's address, Central Society for Clinical Research, October 29, 1948, 1458
Pressure elevations, mechanism of sustained, effects of adrenalin in normal and hypertensive patients in relation to, 332
Procaine penicillin, therapeutic efficiency and a comparative study of absorption, 1232
Propylthiouracil and cholesterol, effect of feeding, on blood cholesterol and arterial intima in rat, 1029
Protamine, rutin, and benadryl, influence of, on experimental purpura in the guinea pig, 1651
sulfate, bleeding temporarily controlled by, plasma defect in, 1480
Protein hydrolysates, gastric acidity response during intravenous administration of, 1627
metabolism, dynamics of, 257, 269
requirements of adult dogs, studies on the minimum, 462
Protein-deficient patients, comparative nitrogen balance studies of oral protein derivatives and natural protein in, 1634
Prothrombin activity, concentration of labile factor of prothrombin complex in human, dog, and rabbit blood, significance of, in determination of, 819
Pseudohypoparathyroidism, 1620
Psittacosis virus, acquired resistance of, to sulfadiazine and effects of chemical antagonists on sulfonamide activity, 1241
Psychoneuroses, premature calcification of costal cartilages associated with, 1621
Psychosomatic problems in a private practice, 1621
Pteroylglutamic acid and pteroyltriglutamic acid, intravenous administration of, in folic acid metabolism studies, 1271
antagonists of, use of, in controlling Rous chicken sarcoma, 1144
deficiency in swine, effect of treatment with pteroylglutamic acid, liver extract, and protein, 397
for hematopoiesis, and antipernicious anemia factor of liver, essentiality of both, 1647
Pulmonary carcinoma, sputum cell study for, as routine laboratory test, 1588
embolism, peripheral blood of patients with, appearance of normoblasts in, 1502
hypertension in chronic hypertrophic pulmonary emphysema, 1453
Purpura, influence of rutin, benadryl, and protamine on experimental, in the guinea pig, 1651

Purpura—Cont'd
thrombopenic; failure of direct blood transfusion to raise the platelet level, 1077
Pyloric balance in ileus, 1625
Pyribenzamine and benadryl, comparison of toxic manifestations produced by, 595
Pyridine hemochromogen, determination of hemoglobin as, 1638

Q

Quantitative complement fixation test for syphilis, method for determination of titers between 10 and 100 in, 383
ischemia in limbs of animals, apparatus for producing, 1450

R

Radioactive isotopes from biologic tissue, recovery and estimation of, 1169
Radioantimony inhaled as stibine, tissue distribution of, 635
Radioarsenic (As^{76}) in treatment of leucemia and allied disorders of the hematopoietic tissues, 1649
Radioiodine tracers in exophthalmic goiter, effect of varying dose of iodine on the behavior of, 1615
Reactive hyperemia, failure of antihistaminic drugs to reduce, 1609
Recording electrocardiographic leads, multiple and special, devices for rapid, 118
Rectal absorption of penicillin, 135
Red blood cells, destruction of, studies on, 1197
counts, Hayem's solution for, methods to increase accuracy in use of, 1180
Renal function, altered, nature of, in lower nephron nephrosis, 1468
hypertension, effect of desoxycorticosterone acetate and propylene glycol in experimental, 1483
Resin artificial kidney, 841
Respiratory and circulatory systems, relation of tobacco smoking to diseases of, 1497
Retinal arteriovenous nicking, 1486
Retrobulbar neuritis, treatment with histamine, 1611
Rh antibodies, detection and identification of, use of preserved erythrocytes for, 1177
studies on, 1353, 1361, 1369
antiserum, analysis of a zone phenomenon in, by splitting the serum into two fractions by means of dialysis, 1353
Rh-immunized pregnant women, anti-A and anti-B isoagglutinin titers in, 1089
Rheumatic fever, plasma protein studies in children with, 1490
renal excretion of salicylate during treatment of acute, 1636
Rice diet, dangers from use of, 1468
Rous chicken sarcoma, effect of nutrition on tumor response in, 1139
use of antagonists of pteroylglutamic acid in controlling, 1144
Rutin, benadryl, and protamine, influence of, on experimental purpura in guinea pig, 1651
effect of, upon resorptive toxicity of certain drugs, 1464

S

Salicylate, metabolism and excretion of, effect of para-aminobenzoic acid on, 1393
renal excretion of, during treatment of acute rheumatic fever, 1636
Saliva, thiocyanate content of, in normal and hypertensive subjects before and after ingestion of the drug, 772
Salmonella blegdam, occurrence of, in Louisiana, 1155
Sarcoma, Rous chicken, effect of antagonists of pteroylglutamic acid in controlling, 1144
of nutrition on tumor response in, 1139
Scholander micrometer burette of simple construction, 1193
Scleroderma and lymphoblastoma cutis, para-aminobenzoic acid therapy in, 1462
Screening method for blood glucose, 236
Screw syringe, 1603
Sedative drug, a new (3,3-diethyl-2,4-dioxopiperidine) evaluation of, 602
Sedatives, effect of, upon urinary volume of pregnant women, 1465
Sedimentation rate technique, simplified, with combined chart and correction nomogram, 511
Sensitivity, castor bean, 1613
of lecithin, variations in different lots of purified, 1220
Serologic studies, influenza and pneumonia, during and after outbreak of influenza B, 32
in Boston during winter of 1945-1946, 15
Serotonin, crystallization of, 1606
Serum, albumin and globulin in, determination of, a rapid clinical method for the accurate, 367
albumin-globulin ratio, cephalin-cholesterol flocculation test, and thymol turbidity test for liver function, a comparative study, 662
antireticular cytotoxic, in arthritis, 768
failure of, 1289
calcium determination, rapid method for, 906
cholinesterase determinations in liver disease, 1475
coagulation reaction, Weltmann, further studies on, 618
dilution turbidity test in, in comparison with thymol turbidity and cephalin-cholesterol flocculation tests, 672

Serum—Cont'd
disease in rabbits, effect of sodium salicylate upon, 936
flocculation reaction with Hayem's solution, routine use of, 1629
human and rat, micro- and macroelectrophoretic analysis of, comparative study, 75
lipase, effect of ligation of pancreatic ducts and of pancreatectomy after duct ligation on, 833
simplified method for determination of, using aqueous tributyrin as substrate, 1047
proteins of blood dyscrasias, electrophoretic analysis of, 1523
studies in, 367, 1276
streptomycin levels, micromethod for determination of, 886
Shock, bacteria-induced, resulting from crushing of muscle in dogs, mechanism of, 502
Sickle cell anemia, pathogenesis of, and the life span of the sickle cell, 975
Sickling of red blood cells, simple and rapid method for demonstrating; use of reducing agents, 1082
Skin, arterioles of, in essential hypertension, 1486
Slide method of cold hemagglutinin test, 1447
Sodium diet, the minimal, its effect on blood pressure of ambulatory hypertensive subjects, 1482
in human biologic fluids, microcolorimetric determination of, 246
salicylate, effect of, upon serum disease in rabbits, 936
Soybean phosphatides as emulsifiers for intravenous fat emulsions, 163
Spectrophotometric determination of blood pH, 881
of urinary bilirubin, 1189
Splanchnicectomy, effect of, on blood pressure and on cardiac and renal function, 1485
Splenic infusion, use of, as base for growing certain pathogenic microorganisms, 1037
Sputum cell study for pulmonary carcinoma as routine laboratory test, 1588
Stain, J.S.B., a modified method of preparing, 777
Sternal marrow hemosiderin, 81
studies in Hodgkin's disease, 1640
"Steroid diabetes" associated with Cushing's syndrome and excretion of 17-hydroxycorticosterone (compound F) in urine; metabolic studies, 1472
Stomach, acidity variations in stimulated and nonstimulated, diagnostic and therapeutic implications of, 1626
cancer of, cytologic diagnosis of, 1633
Stools, streptomycin-resistant bacteria in, development of, in patients treated for tuberculosis, 1460
Streptomycin and penicillin, administration of, by means of hypospray apparatus (jet injection); absorption, toxicity, and stability, 805
Streptomycin and penicillin—Cont'd
in isolation of poliomyelitis virus from fecal specimens, 1402
and phthalylsulfathiazole, effect of, on phenol production, 845
experimental therapy of generalized torulosis in rats with, 1159
serum levels, micromethod for determination of, 886
therapy in United States Army hospitals, 1
Streptomycin-resistant bacteria, development of, in stools of patients treated for tuberculosis, 1460
Subtilin, topical application of, to tuberculous lesions in man, 799
Succinate, effect of, in mescaline hallucinations, 1297
Sulfadiazine, acquired resistance of psittacosis virus to, and effects of chemical antagonists on sulfonamide activity, 1241
Suppurative infection, prolonged, 1607
Surface temperature of body, thermocouples for measurement of, improved mounting for, 1044
Synthetic diets, 1059
Syphilis, false positive tests for, incidence of, in sporozoite-induced vivax malaria, 747
in acute hemolytic anemia, transient positive Wassermann test for, 753
quantitative complement fixation test for, method for determination of titers between 10 and 100 in, 383
transient positive Wassermann test for, in acute hemolytic anemia, 753
Syringe, screw, 1603

T

T wave of electrocardiogram, factors influencing; experimental study employing intracavitary and epicardial leads, 1498
Test, conglutination, in erythroblastosis fetalis, 181
Tetanus antitoxin, purification of, by use of pepsin, 757
Tetraethylammonium chloride, blood pressure maintenance in normal and toxemic pregnancy using, evaluation of neurogenic and humoral factors in, 1466
effects of, on blood flow in extremities of man, 743
Therapeutic malaria, infectious hepatitis inadvertently transmitted with, 998
Thermal trauma, delayed death following, mechanism of, 506
Thermocouples for measurement of surface temperature of body, improved mounting for, 1044
Thiocyanate content of saliva in normal and hypertensive subjects before and after ingestion of the drug, 772
Thiomerin, a mercurial diuretic for subcutaneous injection, experiences with, 1635
3,3-Diethyl-2,4-dioxopiperidine, a new sedative drug, evaluation of, 602

Thrombocytopenia secondary to infectious mononucleosis, 1652
Thrombocytopenic purpura, coagulation defect in, 1479
Thrombopenic purpura; failure of direct blood transfusion to raise the platelet level, 1077
Thymol turbidity and cephalin-cholesterol flocculation tests in serum, a dilution turbidity test in comparison with, 672
influence of ingestion of various lipids upon, 1630
test in various diseases, 565
serum albumin-globulin ratio, and cephalin-cholesterol flocculation test for liver function, a comparative study, 662
Tidal volume recorder for anesthetized dogs, 784
Tissue distribution of radioantimony inhaled as stibine, 635
Tobacco smoking, relation to diseases of respiratory and circulatory systems, 1497
Toluidine blue, bleeding temporarily controlled by, plasma defect in, 1480
Torticollis, acute, due to food allergy, 1614
Torulosis, generalized, experimental therapy of, in rats, with streptomycin, 1159
Toxoplasma neutralizing antibodies, occurrence of, in various disease conditions, 87
Trichostrongylus infection in human beings; need of differentiation from hookworm, 869
Tripelennamine and beta-dimethylaminoethyl benzhydryl ether hydrochloride, comparison of toxic manifestations produced by, 595
Tuberculosis, experimental, effect of nicotinic acid amide on, in white mice, 1249
Tuberculous lesions, topical application of subtilin to, 799
Turpentine, blood changes associated with injection of, influence of adrenalectomy and of adrenal cortical hormone on, 532
2-[α-(2-dimethylaminoethoxy) -α- methylbenzyl]-pyridine succinate, clinical and experimental results of, 319
pharmacologic properties of, 325
2,3-Dithiopropanol, effect of, on gold toxicity in rats, 1024
Typhoid carrier state, treatment of, 1150

U

Ulcerative colitis, duodenal substance in chronic, clinical evaluation of, 1633
United States Army hospitals, streptomycin therapy in, 1
Urate metabolism, role of adrenal cortex in, 1473
Uremia, relation of phenol retention to, 845
Urethane, effect of, on leucemia, further studies on, 1647
Urinary bilirubin, spectrophotometic method for determination of, 1189
estrogens, hydrolysis of conjugated, comparison of methods used for, 207
recovery from caronamide, 297
sediment, erythrocytes in; identification and normal limits, 875
volume of pregnant women, effect of sedatives on, 1465
Urine, bilirubin in, quantitative determination of, method for, 890
corticosteroids in, methods for chemical determination of, 1326
excretion of 17-hydroxycorticosterone (compound F) in, steroid diabetes associated with Cushing's syndrome and; metabolic studies, 1472
in acute hepatitis, antidiuretic activity of, 1476
pregnandiol in, quantitative colorimetric estimation of, simplified technique for, 356

V

Vaccination against influenza, results of, during epidemic of 1947, 789
Venous catheterization with polyethylene tubing, 1597
Ventricular irregularities induced by sympatho-adrenal discharge and chloroform, 1438
Vitamin A intake, high, and blood levels of cholesterol, phospholipids, carotene, and Vitamins C, A, and E, 67
B_{12} and liver extract, effect of, on mucous membrane lesions of macrocytic anemia, 1019
effect of, on hematopoietic and nervous systems in Addisonian pernicious anemia, 1646
in pernicious anemia and puerperal macrocytic anemia, 1477
K, effect of, on dicumarol-induced hypoprothrombinemia in rats, 1431, 1651
Volatile reducing substances (alcohol or ether) in blood and gases, determination of, using barium diphenylamine sulfonate as an indicator for chromic acid titration, 126

W

Wassermann test, transient positive, for syphilis in acute hemolytic anemia, 753
Water by vein, effect of, on the more severe complications of cardiovascular-renal disease, 1467
Weltmann serum coagulation reaction, further studies on, 618
Whole-blood oximeter, recording of oxygen saturation of hemoglobin by, 1637

Y

Yeast phase antigens in complement fixation test for histoplasmosis, 811, 1207
